

TRAILED HARVESTER C 380 T

The Trailed Harvester C 380 T is ideal for olives harvesting in small and big sizes farms.

Its characteristics are:

the high harvesting capacity from the ground and the cleaning of the collected product.

The machine is equipped with flexible tubes, manoeuvred by operators, which gather the product through aspiration.

On request it is possible to fix on this machine an hydraulic lateral harvester, which make the harvesting quicker and easier, avoiding the use of manual tubes.

A selection system cleans the product from impurities and then it is conveyed in a trailer (until 1600 Kg of capacity) or in sacks.

For maximum performance, the area should be worked different times throughout shreadders the preceding year and before the produce falls down.

TECHNICAL DATA

Length (mm)	4500	Included accessories	Aspiration tube, cardan joint, hydraulic piston
Height (mm)	2150	Accessories on request	Hydraulic lateral harvester
Width (mm)	2450	Vacuum hoses diameter/length	160mm/10m
Weight (Kg)	1360	Harvesting Capacity*	2000 Kg/h
Power request	80HP / 60kW		

* The harvesting capacity depends on the ground preparation and on the product quantities on the ground.

CARACTERISTICAS TÉCNICAS						
Longitud mm	Altura mm	Anchura mm	Peso KG	Potencia requerida	Acceso- rios	Longitud/ Diámetro tubo
4500	2150	2450	1360	80- HP/60kW	Junto de cardán y tubo de aspira- ción	10- m/160mm
